

East Japan Great Earthquake
Water Project Report

Installation of ALL WATER
Place: Kesen'numa City Oshima
Municipal Hall
26th March, 2011

ALL WATER installation project report

R-Menshin Co.Ltd.

Kesen'numa city Oshima municipal hall

- Address: Miyagi prefecture Kesen'numa city
Mawaridate 110
- Date:26th March,2011

- Kesen'numa Oshima in Miyagi prefecture is an isolated island. During the East Japan Great Earthquake, flood caused by Tsunami badly destroyed the area and divided the island into two parts. Fire also broke out and people used up water of the reservoir. Furthermore, water supply was cut off therefore safe drinking was urgently required. When we learned about those difficult situations, we decided to offer ALL WATER for free to these areas. Under the cooperation of Self Defense Force we were able to transport and install ALL WATER.

- Kesen'numa Oshima was badly damaged.

- ALL WATER was transported by the cooperation of Self Defense Force.

- Arrival at the community hall.

- Installation of ALL WATER

- Pool water was used as raw water.

The raw water pump was
dropped into the pool.

- Safe drinking water came out.

- Making safe drinking water.

- Generator is also installed against eventual black out.
